NEW RED-LEAVED JAPANESE BARBERRY

IT IS only once in a lifetime that a really worth-while, outstanding novelty in hardy shrubs is introduced, and in this new Barberry we have such a plant.

It is similar in all respects to the green-leaved Japanese Barberry which is so popular for mixing in the shrubbery border, as single specimens, or for planting in clumps on the lawn, as well as for foundation plantings and for hedges, but the foliage of this new variety is of a rich, lustrous, bronzy red, similar to the richest red-leaved Japanese Maples. However, unlike these and other colored shrubs in which the coloring fades or disappears entirely as the season advances, this new Barberry becomes more brilliant and gorgeous throughout the summer, and in the fall its foliage changes to vivid orange, scarlet, and red shades, more brilliant and more effective than in the ordinary Japanese Barberry. In this coloring it is unequaled by any other shrub and is followed by the same brilliant scarlet berries common to the type, which remain on the plant the entire winter.

All that is required to develop its brilliant coloring at all seasons is that it be planted in full exposure to the sun.

WOHLERT'S FLOWERING TREES

Japanese Flowering Cherries • Chinese Crab Apples

The Orient is famous for its flowering trees, especially the Japanese Cherries and Chinese Crabs, which attract thousands of tourists yearly. Why go to the East, when you can have these trees in your own garden, where you can enjoy their glorious bloom of delicate colors, bursting forth with the early breaths of spring. As an inducement for early orders, the following special offers are submitted.
